

SUSTAINABILITY UPDATE 2016 SUMMARY

FOOD. PEOPLE. FUTURES.

From the President and CEO

Welcome to this summary version of our annual sustainability report, which gives a snapshot of our progress in 2015

“ Sustainability is embedded in our business, our culture and the expectations of our customers ”

Sustainability goes hand in hand with the Tetra Pak brand promise – PROTECTS WHAT'S GOOD™ – and the three pillars on which it stands: food, people and futures. Our activities in all three areas over the past year show just how deeply sustainability is now embedded in our business, our culture and in the expectations of our customers and consumers.

Much of our work under the first pillar, food, has focused on finding sustainable ways to feed a fast-growing population, including through the Dairy Hub initiative and school feeding programmes. The second

pillar, protecting people, reflects our commitment to our 23,500 employees and to the communities where we operate. The third, protecting futures, covers the future of our customers' and our own businesses, and the future of the environment. In committing to the Paris Pledge for Action, joining the renewable energy network RE100, supporting the UN's new Sustainable Development Goals and signing up to CE100, we send a clear signal that we are taking a lead in the area of sustainability.

This summary provides a brief overview of our work this year. I hope it will inspire you to want to find out more.

Food

We are driven by our vision to make food safe and available, everywhere. Our innovative and market-leading food processing and packaging solutions are making that vision a reality worldwide.

People

We make social responsibility a priority when it comes to people. We seek to support communities wherever we operate, and provide opportunities for our employees around the world.

Futures

We strive to play an active role in shaping a better future, supporting the long-term success of our customers' businesses and driving environmental excellence across our whole value chain.

2015 in figures

A selection of sustainability highlights from the past year

Food

9.1 billion Tetra Pak packages of food or drink reached over **70 million** children in **56 countries** via school feeding programmes

Our Sri Lanka Dairy Hub has boosted local milk collection by **1100%**, while farmers' incomes have risen by an average **190%**

Our worldwide team of **80** aseptic performance specialists work proactively to prevent food safety and quality issues arising

People

60% of our sites worldwide now have OHSAS 18001 certification

85% of employees took part in our latest engagement survey, in line with the high performance norm

Every Tetra Pak employee has an average **2.5 days'** formal training each year

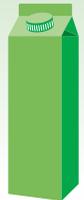

Futures

100% of our paperboard now comes from FSC™-certified and controlled wood sources

43 billion Tetra Pak packages have now been recycled

We have reduced our emissions by **15%** while the number of packages sold has increased by **16%**

Since 2007, we have delivered over **200 billion** FSC™-labelled packages

Since 2011, we have produced over **6.4 billion** caps made from bio-based plastic

Around the world

A round-up of sustainability stories from across the Tetra Pak markets

USA

JUST® water chose to launch its premium spring water in Tetra Top® carton bottle with bio-based plastic, made up of 82% materials from renewable sources

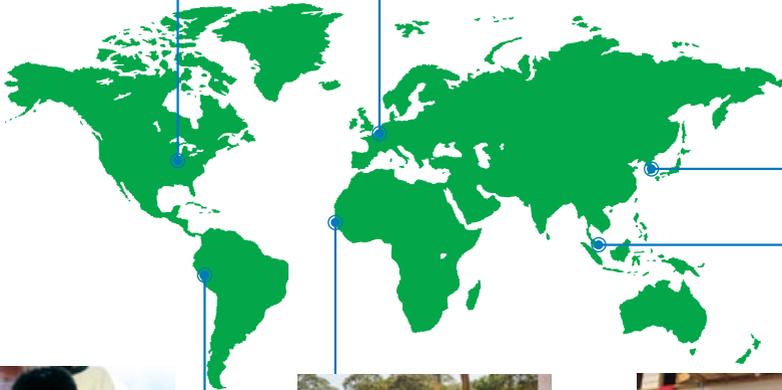

BENELUX

Tetra Pak is working with the government of the Netherlands to cut food waste by increasing consumer understanding of 'sell by' and 'use by' dates

KOREA

A wide-ranging programme including educating consumers and improving infrastructure is having a positive impact on recycling rates in Sejong City

PERU

Our support for the Qali Warma school feeding programme brings the number of children reached by food or drink in our packages to 70 million

SENEGAL & KENYA

New Dairy Hubs in Senegal and Kenya are helping smallholder farmers build profitable businesses, and developing robust dairy value chains

MALAYSIA

Our long-running partnership with Nestlé and social enterprise EPIC Homes is helping to provide new homes for victims of flooding in eastern Malaysia

Our approach to sustainability reaches beyond our own business and incorporates our entire value chain.
